SET UP SECURE LOGIN

(FACE ID, TOUCH ID & FINGERPRINT)

For the Baker Boyer mobile app to use fingerprint scanning, your device needs at least one fingerprint registered. Likewise, to enable face ID, you must have your face registered on your device. If you try to turn on touch ID or face ID in the Baker Boyer mobile app without having them registered on your device, the app will prompt you to register.

Follow the instructions below to turn on biometric sign-in for the Baker Boyer mobile app and to enable face ID or fingerprint scanning on your phone.

1

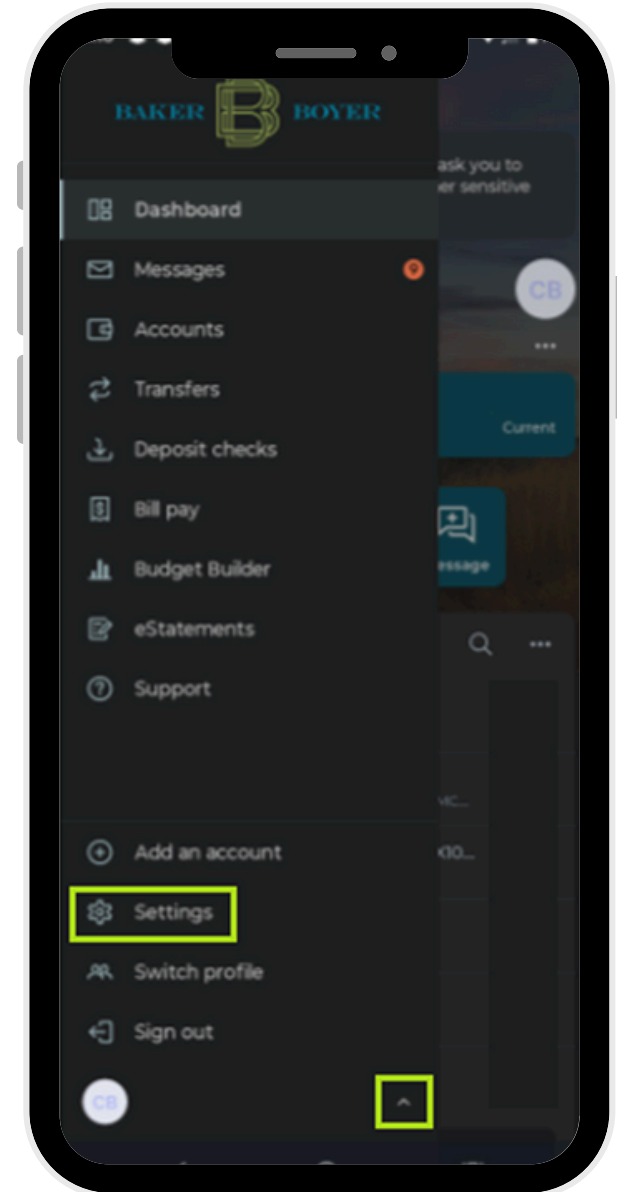

Sign into the Baker Boyer mobile app.

2

Click the menu icon  in the upper left-hand corner to open an array of options.

3

Tap the “^” icon next to your profile at the bottom and select “Settings”.

SET UP SECURE LOGIN (FACE ID, TOUCH ID & FINGERPRINT)

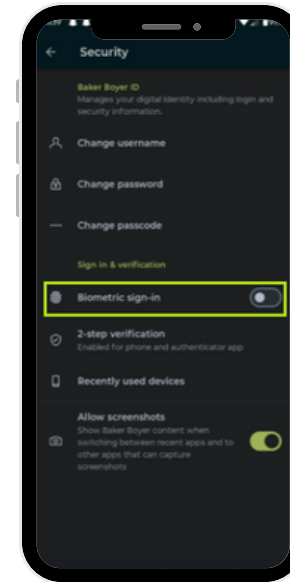

4

Click “Security”, then toggle on “Biometric sign-in”. If you have fingerprint sign-in enabled on your phone already, touch your fingerprint sensor to enable biometric sign-in. If you have face ID enabled, use that instead.

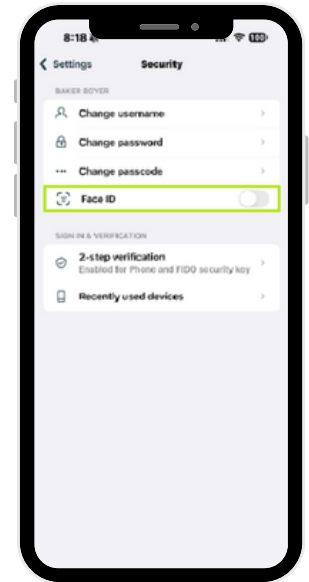

5

If you do not have what you need enabled on your device, press “Enroll” or “Enable Face ID”. You should be automatically directed to your phone Settings app. Follow the relevant instructions below to enable fingerprint scanning or face ID.

ENABLING FACE ID

(IOS INSTRUCTIONS)

Please note, touch ID is not available on newer iPhone models.

1

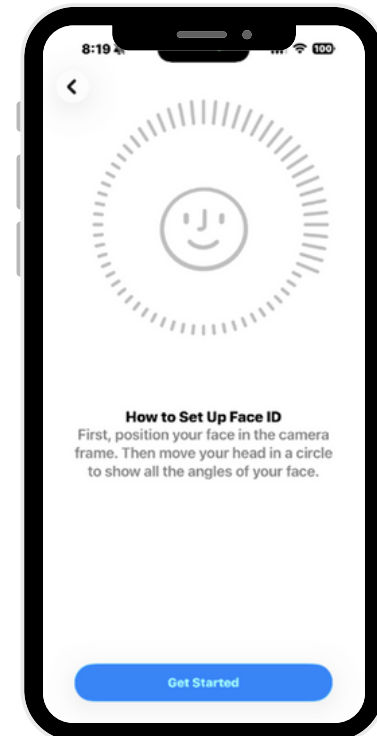

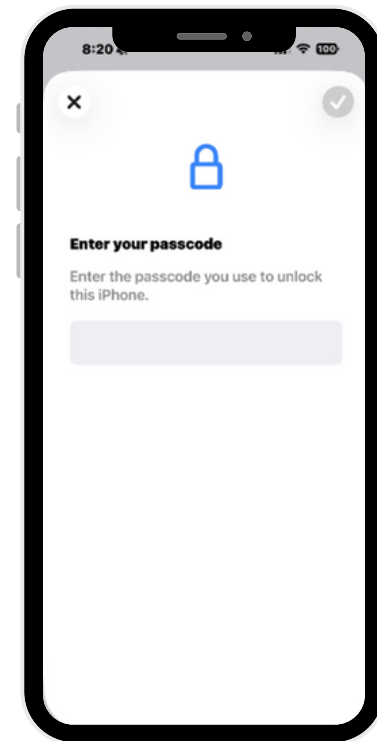

Open your phone's Settings app. Search and select Face ID & Passcode.

2

Input your iPhone passcode.

3

Click Get Started and follow the onscreen instructions.

ENABLING TOUCH ID OR FACE ID (ANDROID INSTRUCTIONS)

1 Open your phone's Settings app. Find and select Security & privacy.

2 Scroll down and select Device unlock.

3 Select Fingerprint or Face Unlock depending on your preference.

4 Enter your phone's password. Then, click Setup. Follow the onscreen instructions.
