

# Income Preservation - Retirement

## Level 1

Portfolio Date: 9/30/2025

### Investment Strategy

The objective of the income preservation portfolio is stability of capital. The income preservation model target allocation is 20% stock and 80% bond. Both are globally diversified with stocks allocated among large, mid and small size companies and bonds allocated among a mix of government and corporate issues.

The level score is provided to help investors better understand potential returns for this portfolio. Levels range from 1 to 5, with a larger number representing greater volatility and greater potential return. The expected 12 month volatility of this portfolio is the 5 Year Trailing Return plus the Gain Deviation and the 5 Year Trailing Return minus the Loss Deviation. This range is meant to be used to compare this portfolio's volatility and return to that of other investment portfolios.

### Income Preservation Retirement - Volatility

Gain Deviation	6.16
Loss Deviation	5.02

Portfolio allocations are subject to change at anytime based on market or other conditions. Performance illustrated is not audited and is meant to give an approximate historical return record based on portfolio management changes we have made over time. Performance indicated is not necessarily what investors achieved due to the specific nature of individual investing. Performance shown is before management fees but is net of fund expense ratios, assumes reinvestment of dividends and capital gains over time and is rebalanced quarterly. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. Past performance is no guarantee of future results. Content should not be considered a solicitation or recommendation with respect to any product or security.
